The King of Lay-Out Boats, The Hercules, is here. The Hercules is everything you ever wanted or dreamed about in a lay-out boat. At 14 feet long it provides more leg room than any other lay-out boat available, and in fact was specifically designed for guys over 6 feet tall !! It's 53" width gives you superior stability and a wider cockpit with plenty of shoulder room, again for the comfort of bigger guys.

We also designed The Hercules to be towed. The Hercules is the only single man lay-out on the market that can be towed easily and confidently at high speeds up to 35 MPH !!!! Just hook it on and go !!! *The Hercules* unique hull design with its ballasted keel allows it to track right behind your tender boat, even when going around corners it stays right behind you, and won't skid off to the side. It's size and design allows you to hunt comfortably through all kinds of conditions, and its low profile virtually disappears in the water. *The Hercules* also has many features designed into it to make it more comfortable and easier to use. It has a molded in backrest and padded headrest for maximum comfort so you can enjoy the hunt. There is a flat shelf area on each side of you to keep your shells, radio etc. close at hand. The Hercules has an adjustable spray shield so you can adapt to the weather conditions you encounter. There's even a molded in gun holder in the deck to hold your gun while you wait for them to come in ! Of course we put a cap on it so your gun will stay put, and a drain in it so your gun won't be laying in water. All this, in a boat that is all hand laid fibreglass, with molded in Battleship grey gel-coat and foam flotation all around you for your piece of mind and safety. All in all we think you will agree *The Hercules is The King of Lay-Out Boats !*

Price : \$ 2595.00 US. Funds

All Prices FOB Our Factory
